

T A C C V

T A C C V

Tidel's advanced automated cash control solution reduces the cost of handling and managing cash, as well as losses from internal theft and robbery. The all new touchscreen interface provides convenient access to functions such as bill acceptance and validation as well as a number of reports designed to streamline your closeout process. Financial transaction storage and system upgrades are a snap with the standard compact flash module. The TACC V has enough storage for 48,000 transactions and the ability to quickly upgrade the bill validator when new notes are released. All these features and more not only make the TACC V a safe business decision, but a smart business decision.
